

Teach Edison: Full-Stack Test Prep for US Entrances

Serving US test prep institutions for US entrance exams.

Five key personas: Admin, Tutor, Learner, Parent, and Curriculum Admin, each with tailored platform roles.

 by Murali Krishna

💥 Key Problems with the Current System

Complex Navigation

Too many tabs, unclear labels, onboarding needs training

No Parent Access

No portal for parents to track progress or scores

No Curriculum Admin

No portal for curriculum admins, who can verify the legitimacy and the viability of the content and tests uploaded

Our MVP: Clean, Clear, Low-Training Experience (Including features from older version)

Simplified Navigation

- 1-3 click access
- Role-based dashboards
- Clear labeling

Parent Portal

- Read-only login
- Real-time student progress
- Tutor comments and peer grades

Curriculum Admin Login

- Uploads all content and question banks
- Makes sure to have all contents to cater to tutors and learners.

MVP Scope: Core Experience, Zero Confusion

Admin Panel

- Platform whitelabeling
- User & institution management

Tutor Tools

- Assign tests
- Detailed reports
- Identify weak subjects

Parent Portal

- Secure read-only access
- Test scores & milestones
- Privacy-first design

Learner Dashboard

Take tests

Access progress reports

Access learning content

User Stories

1

Easy Question Bank Access

As a tutor, I want to quickly navigate to the question bank from my dashboard so that I can assign relevant questions to students without getting lost in menus.

2

Question Upload

As a curriculum admin, I want to upload and tag questions with subjects and difficulty levels so that tutors can easily find them during test creation.

3

Instant Search

As a parent, I want to view my child's progress without contacting the tutor so I can stay informed about their test readiness.

Acceptance Criteria

Easy Question Bank Access

- A clearly labeled "Question Bank" tile is present on the tutor dashboard.
- The tile leads directly to a searchable, filterable list of all questions.
- No more than 2 clicks are required to assign a question to a test.

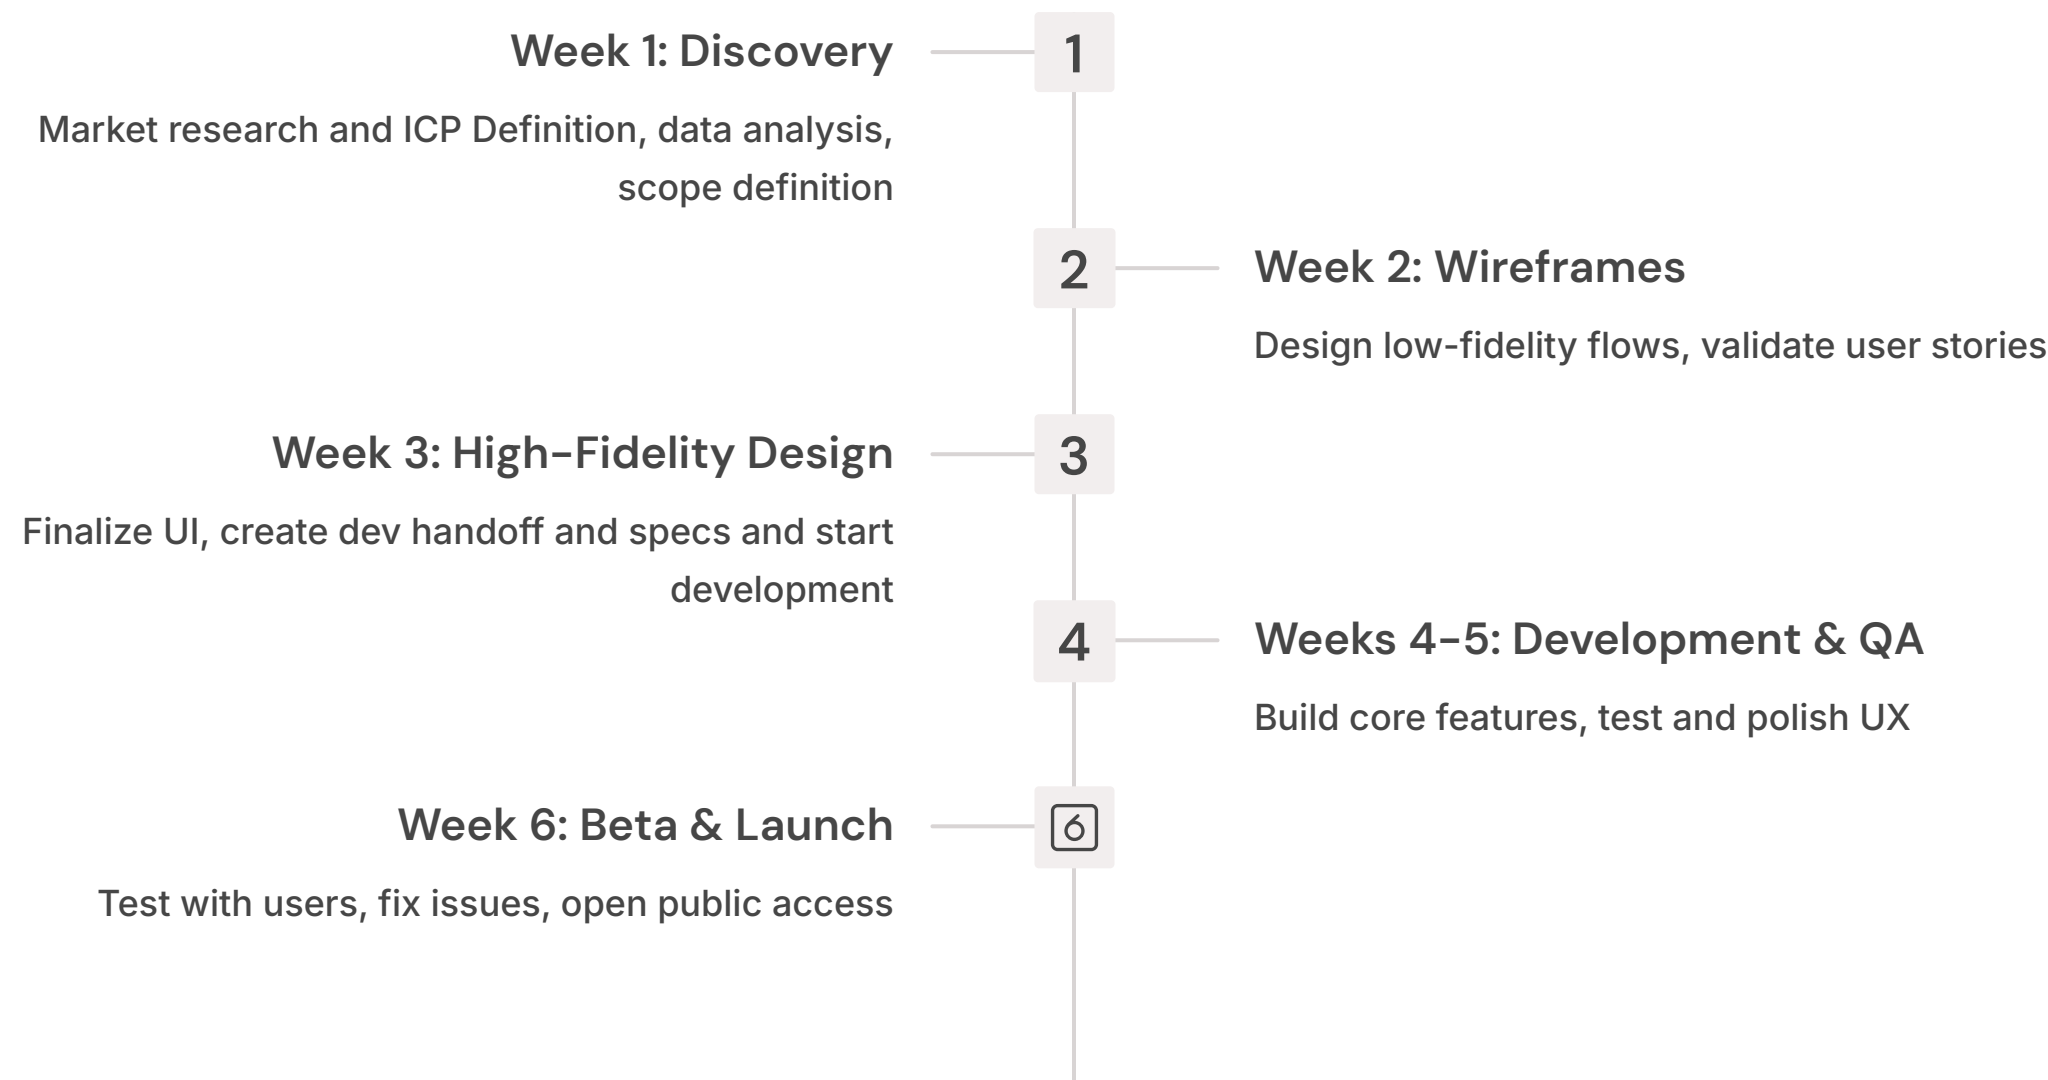

Question Upload

- There is a simple upload interface for adding new questions (manual entry or CSV import).
- Tags can be added for subject, difficulty, and test type (SAT/ACT).
- Uploaded questions appear in the question bank instantly and are searchable.

Instant Search

- Parent receives a secure login linked to their child's profile.
- Upon login, the parent sees test scores, tutor notes, and a visual performance graph.
- Parents cannot edit or interact with the student's learning content.

Development Roadmap: Weeks 1–6

Success Metrics: Tutor and Parent Engagement

Key Product Processes I'd Introduce

Weekly Product & Design Critique

Spot UX friction early and align teams through 1-hour sessions. Review features with structured feedback: What's working, unclear, or missing.

3-User Micro Usability Tests

Test features with 3 users per persona. Capture real confusion, not opinions, feeding insights into design sprints for improvement.

Weekly Governance Calls

Weekly calls to assess the strengths and weaknesses of the team and track progress.

"Cut the Clutter" Grooming Sessions

Monthly reviews to prune unused or complex features. Team votes to keep or kill, clearing noise before it grows.

Tools Proposed to be Used in the Platform

1. **Jira:** Streamlines project management and issue tracking for agile teams
2. **Confluence:** Central hub for documentation and team collaboration
3. **Sonarqube:** Ensures code quality and detects security vulnerabilities early
